Eric,

We are restructuring the layout of the line items for the Bid so that we have several time frame/ volume periods built into the bid. This will be necessary in order to allow us to extend the subcontract beyond any period developed and allow for incremental funding as well as performance beyond the current task order performance end date of April 28 2017. In discussions with Mark O late last week, he suggested we also place a performance section in this IFB so we have an additional methodology to terminate the sub agreement in the event we encounter any performance issues with a selected vendor as this bid is for T&D and rental, delivery and transport of waste roll offs as well.

I am working on some of that performance based language today and will be discussing with Janelle and purchasing tomorrow.

The T&D Bid looks good. You have to explain the sub incremental funding more to me. Site visit is good to offer up until August 25<sup>th</sup>. I assume the visit by US Ecology yesterday already counts. This is really for Energy Solutions. The due date should be the 29<sup>th</sup> or 30<sup>th</sup>. Whichever works best for you all. I like the September 12<sup>th</sup> mobilization date for roll offs to stay the same.

Thanks

**Subject:** NFB draft T&D IFB

**Importance:** High

Please take a look at the rough draft and we can discuss, edit, and hopefully finalize and get this out.

I believe we need to add a section on incremental funding for sub contracted service and also a section on a site visit being offered but they must make that visit by 8-25-16 , 1400 hrs and I guess that will change the due date until Friday the 26<sup>th</sup>.???

Thoughts
